PROPORTIONAL JOY-STICK CONTROLS

Dingli's joystick uses proportional drive controls to determine the movement of the device. The driving functions and directions are dependent upon the amount of pressure or force applied to the control. This facilitates better maneuvering control. Electronic joysticks create analogue electrical outputs to control and operate the lift.

COMPACT & STABLE

Equipped with a self-gravity lowering system and built-in position sensors, Dingli's oil free range is sturdy and compact.

PERFECT FOR INDOOR APPLICATIONS

Ensuring safe eco-friendly elevations at maintenance-free ease, Dingli's revolutionary oil-free lift is perfect for indoor applications as there are no oil spills or harmful emissions.

TWO WAY DRIVING & STEERING

Two-wheel drive vehicles enhance operational efficiency by using less energy to power the wheels. The two-way steering ensures the rear wheels follow the path of the front wheels. This facilitates a seamless movement.
